Rail wagons

We are your partner for building and optimizing bulk material plants. Based on our broad range of in-house components and products as well as on our many years of experience, we are able to provide the right solution to every requirement and every problem.

Trust in our strengths.

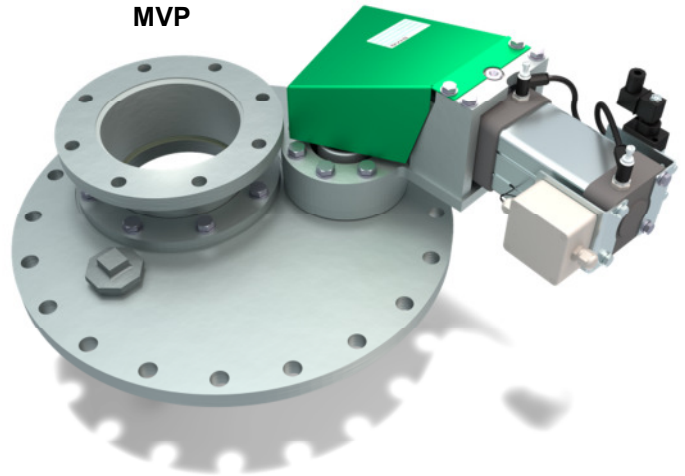

Products

STAG

Our products at a glance

- ✓ Special bulk product devices of any type
- ✓ Pneumatic conveying systems incl. dosing
- ✓ Mechanical conveying systems
- ✓ Breaking and milling facilities for processing
- ✓ Silo and bunker equipment
- ✓ Discharging systems for silo and bunker
- ✓ Rail unloading systems and container handling
- ✓ Coarse material separator and foreign particle sieve

MVP

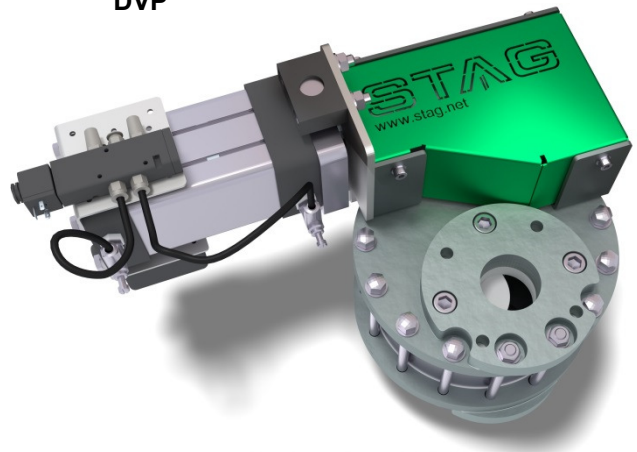

Dual-sealing slide especially for use in applications in bulk material handling components

The original is always provided by STAG!

- ✓ Many years of experience in bulk material handling
- ✓ One device suited for all applications
- ✓ Test centre and bulk laboratory

We provide you with a solution adapted to every problem or requirement!

DVP

Customer-specific requirements are analysed, and appropriate solutions developed.

Based on our experience, we will support you from the conception to a turnkey delivery.

We are your point of contact for all matters.

Products

STAG

Discharging systems

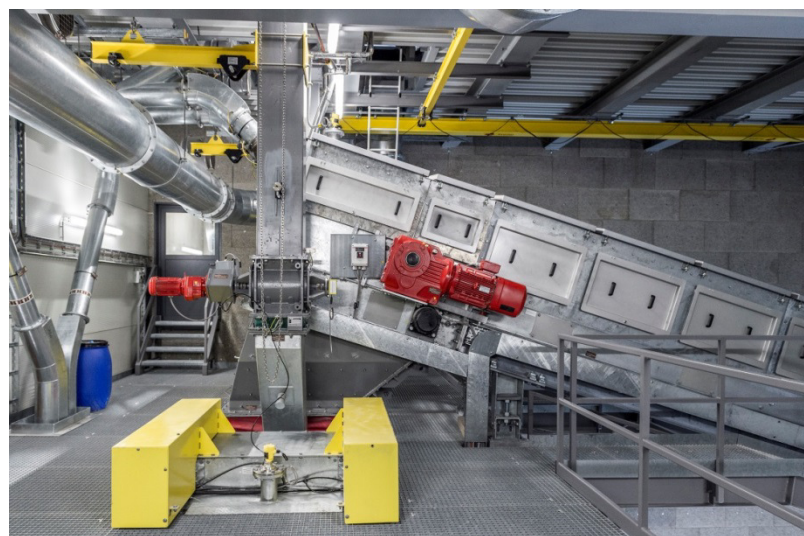

- ✓ Trough chain conveyor up to 800°C
- ✓ Pressure conveying vessel up to 20 m³
- ✓ Special butterfly valve geometry for adsorbens
- ✓ Gravimetric and volumetric dosing systems
- ✓ Dust-proof belt conveyors incl. scraper floor
- ✓ and many more

Organisation

The STAG Service team will take care of any of your requirements. A small, highly powerful team of specialists will support you with a focused, solution-based approach.

Personal contacts are our hallmark.

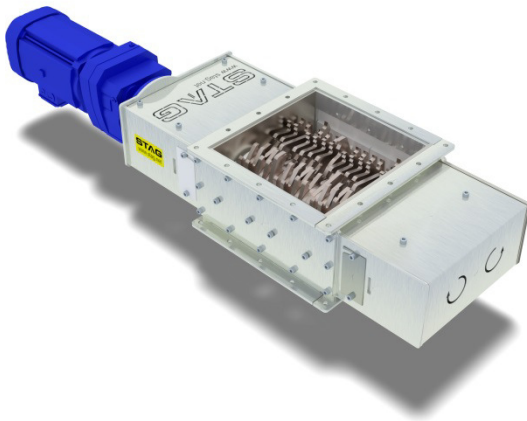

Breaking and milling

STAG provides you with the best suitable processing unit for your bulk product.

- ✓ Impact mill with bypass
- ✓ Standardized foreign particle sieve as additional assembly
- ✓ Various lump breakers integrating a set of Hardox blades (different versions).

Silo equipment

- ✓ Mechanical discharging systems (SILEX)
- ✓ Various pneumatic discharging systems
- ✓ Adjustable, weight-loaded overpressure/vacuum valves
- ✓ Fluid floor and fluid channels for silos and bunkers

A silo in our test center can be used for discharging tests / experiments. And in our laboratory, your bulk material can also undergo an analysis.

Products

STAG

Rail unloading systems and container handling

- ✓ Manual and semi-automatic rail wagon unloading facilities
- ✓ Container handling
- ✓ Filling adapter and big bag loading stations
- ✓ and many more

Based on our many years of experience in the equipment of rail wagons, rail wagon service as well as in the construction of rail unloading stations, we are the perfect partner when it comes to such products and systems.

Container filling, container handling as well as an optimal bulk material distribution in the container count among our strengths.
